Between 22 and 27 October, mixing machines were shipped by rail to Saxony and a large portion of the narrow-gauge field railway tracks were removed. Some tracks were observed in the eastern section of the field, at the end of the runway, where earthwork was going on. It is the opinion [] that work will probably continue there for about 2 or 3 more weeks. A Soviet labor unit seeded grass in the eastern section of the field. Cleaning up work near the destroyed hangars was completed by the Soviets. Reconstruction started on the western hangars. *

* [] Comment. The report indicates that most of the construction at the airfield was completed.
